

Coca Cola Korea Bottling Company (CCKBC) produces, bottles and distributes Coca Cola's range of products in Korea.

Fleet: **2,000**

Previous system: **Excel**

System chosen: **FleetWave**

Installed: **July 2003**

Client brief

CCKBC's major objective for their fleet management system was to track and control cost issues and to have the ability to view the system in multiple languages.

Other main requirements focused on vehicle-related issues such as accident, fuel, tyres, spare parts management, maintenance and general management.

Solution

The uniquely flexible, browser-based functionality of FleetWave from Chevin Fleet Solutions was the ideal solution for CCKBC.

Client benefits

- Ability to track costs against a Korean Standard costs database.
- Ability to manage fuel usage.
- Ability to manage budgets and costs.
- Reporting capability on all historical data.
- Ability to share real-time information with internal and external users.
