

DVSA EARNED RECOGNITION

FleetWave is a multi-award winning fleet maintenance system approved for the DVSA's Earned Recognition Scheme

Benefit from a fully digital vehicle and maintenance management system, allowing your fleet to remain compliant with DVSA's vehicle operator standards, and achieve the KPIs required for meeting Earned Recognition.

Benefits of FleetWave

Store records digitally

Keep all your vehicle records securely stored in a single location, instantly accessible from the cloud.

Eliminate paperwork

Remove the need for filing cabinets and the administrative burdens of paper processes, making your fleet fully digital.

Work together

Allow your workforce to collaborate in one central system with multiple user access levels to different data and functions.

Automate processes

Automatically send KPIs directly to the DVSA, pre-configured in the approved format for Earned Recognition.

Performance visibility

View real-time status of your DVSA KPIs including a colour coded status of MOT pass rates, open defects and more.

Digital forms

Complete defect and inspection forms via an integrated mobile app, meaning no more clumsy paper processes.

Alerts and reminders

Automatic reminders ensure relevant personnel are alerted to diary events such as MOTs, and service reminders.

Preventative tools

Auto-highlight exceptions or issues that may cause compliance failures, relevant to the operator licence.

Agency

Approved vehicle system

As an approved IT system provider, any fleet operator that successfully signs up to the Earned Recognition pilot can use FleetWave to automate the reporting of vehicle maintenance KPIs back to the DVSA.

Pre-configured KPI settings

FleetWave handles the maintenance reporting schedules and measures compliance set by the DVSA, so your organisation can concentrate on the actual fleet and maintenance management work required to achieve the Earned Recognition targets.

Number	Measure	KPI
1	Complete set of safety inspection records	100%
2	Safety inspection records are completed correctly, including all relevant sections, and signed off	100%
3	Safety inspections are completed within the stated period	100%
4	Driver defect reports where road safety related items have been reported are appropriately actioned	100%
5	Vehicle and trailer MOT initial pass rates	95%

Monitor compliance

Automatic FleetWave events pull all the information required for maintenance reporting to the DVSA and build and calculate your maintenance KPI results in the colour coded traffic light system.

Each item in FleetWave that the DVSA requires, will give you the compliance target percentage, colour grading and highlight vehicles producing any variances, allowing you to clearly see how you can improve results.

Type of alert	Level	When it's triggered
Yellow	Minor	Missing a KPI by less than 1% point
Amber	Moderate	Missing a KPI by 1% point or more
Red	Major	Missing a KPI by 2% points or more

Automated reporting

The KPI information held inside FleetWave is automatically emailed to the DVSA in the relevant reporting period.
